| PROFESSIONAL EXPERIENCE

BizFlow Corp. - Software Developer (Remote)

Phoenix, AZ 04/2020 - Present

- Design & develop **front-end user interface** based on specific client requirements using **Angular 2+** modules, templates & services
- Perform **client-side validations** utilizing modern **JavaScript (ES5/ES6)**
- Fix **bugs** and provide **support services** for the lifecycle of the application

Locally Yours PDX - Software Developer Intern (Remote)

Portland, OR 09/2019 - 04/2020

- Implemented client-facing **user friendly design** for all **front-end web** development using modern **HTML5**, **CSS3** and **JavaScript (ES5/ES6)**
- Delivered strategic user stories and **wireframes** according to the client's **PhotoShop Design File (PSD)**
- Collaborated with Sr. Developer to write and test code to eliminate **front-end / cross-browser compatibility** issues efficiently and accurately

Arthrex California Inc. - HR Assistant

Walnut, CA 05/2017 - 05/2019

- Handled all administrative HR responsibilities related to the overall employee experience (e.g. benefit inquiries, open requisitions)
- Led new hire training and orientation (~ 4 per fiscal quarter) to introduce new employees to the company, mission, and functions.

| PERSONAL APPLICATIONS DEVELOPED

Heritage Farms - [Demo](#) | [GitHub](#)

A demo e-commerce application for purveyors of quality steaks

- Engineered with **React.js** for complete **front-end** application functionality utilizing customized and reusable **components** and **props**
- Built a **RESTful API** in **PHP** to send **JSON** encoded data between the client & server systems
- Deployed **LAMP** stack web based application using a virtual **Linux Ubuntu** system served with an **AWS EC2** instance.

Ohana Tracker - [Demo](#) | [GitHub](#)

An application for new parents to keep track of data related to their newborn

- Developed **Front-End** with **React.js**, **CSS3**, & **Bootstrap4** for dynamic user experience (**UX**) and a simple user friendly design (**UI**) to promote easy one-handed use
- Constructed **Back-End** with **Node.js** connected to multi-table **MySQL** database to retrieve newborn data (e.g. feeding times, nap times, & diaper changes) via **API Fetch Calls** to perform **CRUD** operations

| TECHNICAL SKILLS

Strong:

JavaScript (ES5/ES6)
React.js
HTML5
CSS3
jQuery
OOP
Bootstrap 4
RESTful API

Experienced:

Angular 2+
TypeScript
Node.js
Express
PHP
MySQL
Apache2
WordPress
Shopify
Linux (Ubuntu)

Tools:

Git | GitHub
Command Line Terminal
npm
Angular CLI
Docker
Webpack
MeisterTask
Trello
Figma
Chrome | React Dev Tool
Postman
AWS
Agile Methodology
