| WORK HISTORY

Locally Yours PDX - Web Developer Intern (Remote)
Portland, OR 12/2019 - Present

- Create front end website layout/user interface by utilizing modern **HTML5** and **CSS3** practices, per the client's **Photoshop design file (PSD)**
- Collaborate with Sr. Developer to write and test efficient code by using the best web development practices (**JavaScript | ES5/ES6**)
- Managed Trello task management board to ensure tasks and project requests are recorded and completed appropriately

Arthrex California Inc. - HR Assistant
Walnut, CA 05/2017 - 05/2019

- Handled all administrative HR responsibilities related to the overall employee experience (e.g. benefit inquiries, open requisitions)
- Worked collaboratively with HR Manager to develop and maintain relationships with employment agencies, local universities, and other recruitment services
- Led new hire trainings and orientation

| APPLICATIONS DEVELOPED

Guitar Flip Memory Match Game - Demo | GitHub
A "Guitar Collection" memory matching game
- Engineered with **JavaScript** for complete application functionality that includes win-conditionals, user stat tracking, and in-game logic
- Incorporated **jQuery** to **manipulate** and **dynamically** create **DOM** elements
- Built with **HTML5** and **CSS3** for **desktop** and **mobile responsiveness**

Ohana Tracker - Demo | GitHub
A team developed application for new parents to keep track of data related to their newborn
- Developed **Front-End** with **React.js, CSS3, & Bootstrap4** for dynamic user experience (**UX**) and a simple user friendly design (**UI**) to promote easy one-handed use
- Constructed **Back-End** with **Node.js** connected to multi-table **MySQL** database to retrieve newborn data (e.g. feeding times, nap times, & diaper changes) via **API Fetch Calls** to perform **CRUD** operations
- Applied **Agile** methodology by utilizing **MeisterTask** (for progress management) and daily standup meetings (for clarity on team landscape and progress) to rapidly deliver a fully functional application

The Helpful Calorie Counter - Demo | GitHub
A Content Management System to keep track of user caloric intake
- Built **Front-End** single page application interface with **React.js** & **JavaScript**
- Created **Back-End** server built with **Node.js** to update **JSON** database
- Utilized **Bootstrap 4** for responsive desktop and **mobile** design

| TECHNICAL SKILLS

Strong:
JavaScript (ES5/ES6)
React.js
HTML5
CSS3
jQuery
Bootstrap 4
APIs (AJAX, FETCH)

Experienced:
Node.js
Express
PHP
MySQL
Linux (Ubuntu)
OOP
npm

Tools:
Git | GitHub
Command Line Terminal
MeisterTask
Trello
Figma
Chrome | React Dev Tool
Postman
AWS
Agile Methodology

| EDUCATION

Azusa Pacific University
Master of Arts |
Psychology

California State University Long Beach
Bachelor of Arts |
Psychology

LearningFuze Software Development Program
Certificate |
Software Development
